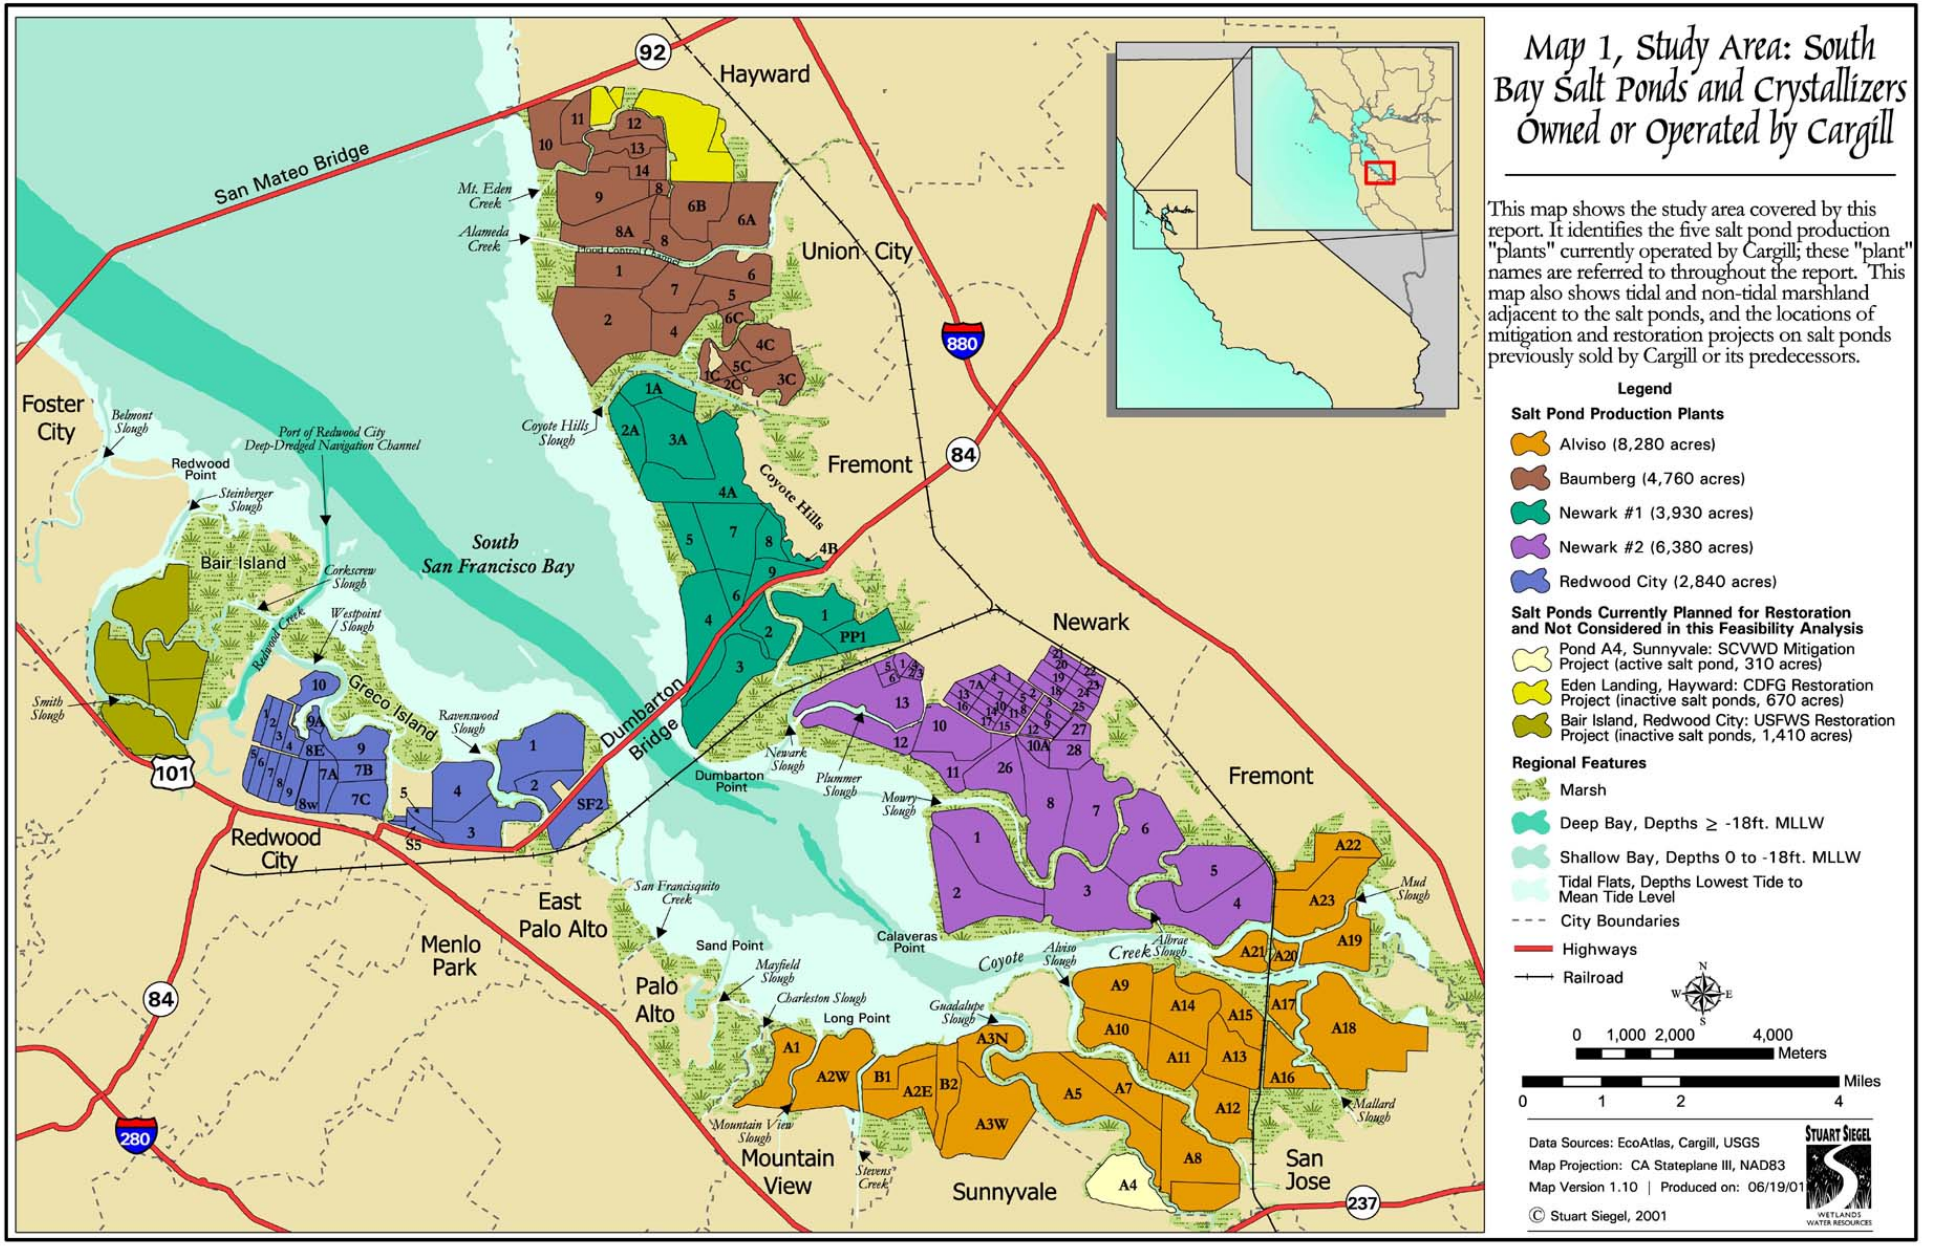

Map 1, Study Area: South Bay Salt Ponds and Crystallizers Owned or Operated by Cargill
This map shows the study area covered by this report. It identifies the five salt pond production "plants" currently operated by Cargill; these "plant" names are referred to throughout the report. This map also shows tidal and non-tidal marshland adjacent to the salt ponds, and the locations of mitigation and restoration projects on salt ponds previously sold by Cargill or its predecessors.
Legend
Salt Pond Production Plants
Alviso (8,280 acres)
Baumberg (4,760 acres)
Newark #1 (3,930 acres)
Newark #2 (6,380 acres)
Redwood City (2,840 acres)
Salt Ponds Currently Planned for Restoration and Not Considered in this Feasibility Analysis
Pond A4, Sunnyvale: SCVWD Mitigation Project (active salt pond, 310 acres)
Eden Landing, Hayward: CDFG Restoration Project (inactive salt ponds, 670 acres)
Bair Island, Redwood City: USFWS Restoration Project (inactive salt ponds, 1,410 acres)
Regional Features
Marsh
Deep Bay, Depths ≥ -18ft. MLLW
Shallow Bay, Depths 0 to -18ft. MLLW
Tidal Flats, Depths Lowest Tide to Mean Tide Level
